What makes the ZIPBOLT UT Rail Bolt better than traditional rail bolts?

The ZIPBOLT UT Rail Bolt components:

THE GEAR HEAD

Gear Head is a one piece totally enclosed mechanism with hardened steel gears.

At least 4 easy ways to tighten the ZIPBOLT UT Rail Bolt:

Option 1
Ratchet screw driver with 5mm driver.

Option 2
Drill with 5mm driver. Start on the lowest torque setting until you find the one that works best.

Option 3
5mm "T" handle allen wrench.

Option 4
5mm allen wrench.

Saving Time = Saving Money

Design inspired by stair builders, for stair builders.
